VISION:

AeroHélice aims to be the first choice of its customers and present a strategic vision focused on profitability, productivity and competitiveness.

MISSION

We are a "Maintenance, overhaul and repair services for aircraft propeller, governors, wheels, brakes, Non-Destructive Testing and Surface Treatment", to meet the needs of our customers, with a view to continuous improvement of our performance.

VALUES

- ✓ Rigor / Quality
- ✓ Professionalism
- ✓ Recognition of employees
- ✓ Respect and rigor with the commitments

QUALITY POLICY

AEROHÉLICE has set its Vision, Mission and Values to consolidate and strengthen its corporate culture - a benchmark in Quality as "Maintenance, overhaul and repair services for aircraft propeller, governors, wheels, brakes, Non-Destructive Testing and Surface Treatment".

In this sense, a Quality Policy was defined with the following guidelines:

AEROHÉLICE's quality and safety policy is geared primarily to safety over all services provided, as well as to "safety / quality / cost" optimization.

To achieve optimal safety standards, AEROHÉLICE constantly applies human factor principles, urging all personnel to report errors and incidents during all maintenance procedures.

The company's culture is underpinned by the integration, motivation and mutual recognition of people, being professional training and continuing a constant concern for the improvement of people's individual skills and the company's ability to work.

It is the duty not only of AEROHÉLICE but mostly all staff, strict adherence to the procedures, internal standards of quality and safety and all regulations issued by manufacturers and aeronautics authorities as well as cooperate with all audit teams or internal and external, so that the end product is reliable, of quality and safety.

This way is responsible for the proper management, with actions to address risks and opportunities and ensuring the means necessary to maintain the standards set out in the Quality Management System. It is also responsible for the continuous satisfaction of its customers' expectations, unequivocally, regarding the cost / quality ratio.

Working closely with stakeholders, suppliers, public entities and employees

It is committed to continuous improvement of quality management system, to the satisfaction of the requirements and available to interested parties all relevant information.
